EXPERIENCE

Jyesta Corporate Entity—Machine Learning Intern

Jul 2025 – Sep 2025 | Remote

Completed a remote internship involving real-world machine learning tasks and guided project activities.

Gained hands-on experience in Python, data analysis, and foundational ML workflows.

Built understanding of model basics, preprocessing steps, and practical problem-solving approaches.

Demonstrated strong dedication, consistency, and professionalism throughout the internship.

SKILLS

Python Programming.

SQL Programming.

Java Programming.

C Programming.

Git and GitHub.

Web Development.

Excel.

Machine Learning(Basics).

Data Structures & Algorithms
(DSA) / Problem Solving.

EDUCATION

Vel Tech Rangarajan Dr. Sagunthala R & D Institute of Science & Technology, Chennai

B.Tech in Computer Science and Engineering (AI & Data Science)

Aug 2023 – Dec 2027 (Pursuing)

Coursework: Machine Learning, Python, Java, SQL, C, AI Fundamentals.

Activities: Coding Clubs, Technical Events, Group Projects

Narayana E-Techno School, Chennai

Higher Secondary Education (Bio-Maths)

Jun 2020 – Mar 2023

Subjects: Biology, Mathematics, Physics, Chemistry.

Velammal Vidyashram School, Chennai

Secondary School Education (Class 10)

Jun 2010 – Mar 2020

Completed secondary education with good academic performance and participation in school activities.

ADDITIONAL

- Python Programming — NIIT
- SQL Database Fundamentals — NIIT
- Machine Learning Internship — Jyesta Corporate.
- Machine Learning Training—Jyesta Corporate .
- Expert Talk: Data Engineering for AI — [Pod.ai](#).
- Infosys Certifications.
- Regularly Engage in coding Platforms.

PROJECTS

Task Tracker Application — Python

Developed a terminal-based task manager with add/view/update/delete features and task prioritization.

Implemented persistent storage and generated reports for completed vs pending tasks.

Student Attendance & Performance Tracker — MySQL

Created a database-driven system to automate student attendance and performance tracking.

Implemented triggers, stored procedures, and analytics queries for reporting top performers and low attendance.

Personal Expense Tracker — Python & SQL

Built an expense manager to record, categorize, and analyze daily expenses with monthly reports.

Used SQLite/JSON for persistent storage and implemented data validation for accuracy.

Student Management(CRUD)-Built Using Python and SQL

Developed a CRUD-based system to manage student records, including add, update, delete, and view functionalities.

Implemented SQL database for persistent storage and ensured data validation for accuracy.

E-Commerce Website — HTML, CSS & JavaScript

Built a responsive front-end website to display products, cart functionality, and user interactions.

Implemented dynamic UI features using JavaScript for a better user experience.

Sales Dashboard — Built Using Excel

Created an interactive dashboard to visualize sales data using charts, pivot tables, and summary reports.

Enabled data-driven insights to track sales trends and performance metrics effectively.
